Climate of the La Rochelle's Area :

One of the important characteristic of the La Rochelle's area is the regularity of the sea breeze. Races in La Rochelle are fair and regular. The winds blow mostly from south-west to north-west (3 to 5 Beaufort). In the summer time, the mean wind's strength lies around 12 knots (3 to 4 bft). Due to the sea breeze effect, the wind increases at the end of the morning and in the afternoon. La Rochelle lies on the ocean shore, so the heat doesn't become unbearable.

The sea breeze is quite regular in the summer. The average temperatures lie between 22⁰C and 25⁰C. The water temperature is of about 20⁰C in the Pertuis and 22⁰C along the coast. Don't expect fog or storms. The current is weak and its strength depends on the tide's coefficient.
